

[GPW 10X10]
6mm 10" x 10" GLASS GEORGIAN POLISH WIRE

6 mm (1/4") thick 10" (254mm) x 10" (254mm) Georgian Polish Wire glass for the IE11C type valve cabinets. The GPW glass is a double pane glass with a Georgian Polish Wire in the middle that holds most of the glass if broken. The GPW glass is a stronger pane of glass than the standard glass and will withstand a greater impact. The glass is used primarily in complexes where risk for breakage may occur.
