

IE2600A-A-15-FF-SS

1.5" (F)NPT X 1.5" (F)NPT (BR) ANGLED ADJUSTABLE REGULATING VALVE W/ TAMPER SWITCH

INFORMATION:

The Wilson and Cousins' IE2600A-A-15-FF-SS (Adjustable Series)
The IE2600A series Field Adjustable Valve 340 psi rated is controlled by a single spring in the bonnet.

The Spring allows for one type of valve to be installed and can be adjusted to meet the correct pressure reduction ratio required for their specific location.

The inclusion of a Supervisory Switch allows for external monitoring of the valves
Open/Closed position.

Designers have the option to choose from a range of Six different spring Settings for both the 1.5" and 2.5" size valves allowing one to satisfy all required inlet/outlet pressure values.
